

Vinal Tech CJPS

Community Service Award

The Criminal Justice and Protective Services Program Community Service Award is awarded to any member who contributes half or more of their community service hours to program related events or any member who contributes hours above and beyond the required amount. CJPS Student W.K. falls into both of these categories. His commitment to the Portland Volunteer Fire Department is exemplary and he is a valued member of their team. In speaking with other members of the department, W.K. is highly appreciated for the time and effort that he puts into department drills and while he is on calls. He has taken the time to learn how to use the tools found on the fire apparatus properly, where they are all located, and assists with equipment management during calls which makes him an invaluable member of the response team. W.K.'s commitment to the fire service extends beyond this however. He also talks with younger kids about the fire trucks and the equipment during community events and assists with the department's monthly pancake breakfast. The countless hours that W.K. puts in with the Portland Volunteer Fire Department is not only commendable, it is admirable.

Vinal Tech CJPS is proud to recognize W.K. and present him with the Community Service Award; the first award issued in program history State-wide. Congratulations W.K., continue your eagerness to always learn and grow!
